SUMMARY

Web Developer with over 2 years of experience in designing, developing, and maintaining web applications using HTML, CSS, JavaScript, and PHP (Laravel). I combine UI/UX principles with programming skills to create responsive, user-friendly, visually appealing interfaces, and focus on performance optimization. Currently eager to expand my skills in React.js and other frontend technologies

WORK EXPERIENCE

Web Developer, PT. Grune Teknologi Indonesia *(Full-time)*　　　　　　Dec 2024 - Current

- Developed web applications for clients primarily using Tailwind, Laravel Inertia, React.js, and TypeScript
- Performed quality assurance of web applications by conducting unit testing in Laravel.

Web Developer, PT. APPKEY *(Full-time)*　　　　　　Jul 2022 - Oct 2024

- Developed and maintained web applications with responsive interface using HTML, CSS, Bootstrap, JavaScript (jQuery), and PHP (Laravel).
- Developed and integrated RESTful APIs into web and mobile applications
- Implemented third-party services APIs for client web applications, including Square Payment Gateway, Midtrans Payment Gateway, and Google Place API.
- Developed a mobile application using Flutter and achieving 1000+ downloads on the Play Store

Web Developer, Kayana Creative *(Internship)*　　　　　　April 2022 - July 2022

- Independently designed and developed a waste management web application for Ungasan village utilizing HTML, CSS, Bootstrap, JavaScript (jQuery), and PHP (Laravel).
- Built a responsive and user-friendly interface for four user roles: client, waste collector, accounting, and administrator
- Presented the project to stakeholders, delivering a live demo of the web application to showcase its features
